

IGRIP - A FLOURISHING ENTERPRISE

iGRiP, the stud of choice, is proud to announce it has reached an agreement with MM Industrial Sales, LLC . to be the US Distributor of the newest stud on the market.

iGRiP, the stud of choice, is proud to announce it has reached an agreement with MM Industrial Sales, LLC . to be the US Distributor of the newest stud on the market.

iGRiP a Canadian enterprise founded in 2015, specializes in the design and fabrication of screw-on studs for ice, rough terrain, construction, and more. The company has been able to carve-out a market in Canada, the USA and Europe. In 2021, iGRiP received its patent for a new type of screwable stud of superior quality, namely the shouldered stud, which is more secure, more reliable and easier to install. With their innovative products and unique design, which are favored by those who use them, iGRiP's popularity continues to increase with each passing season.

The business is currently expanding its North American distribution network via multiple service points throughout the continent. For 2024, they are well underway to establishing their state-side sales force working with MM Industrial Sales LLC, located in Kingsford Michigan. Consequently, their products will be easily accessible across the USA.

INNOVATIVE PRODUCTS

iGRiP offers a wide range of products which are applicable to several industrial sectors i.e., forestry, construction, mining, industrial, recreational and security. Their studs are made of tempered and galvanized steel which are then fitted with tungsten carbide tips which greatly increases resistance to wear and also life expecting of the product.

The shouldered studs (SS) have an added advantage in that they ensure greater stability

and prevent the studs from bedding deeper into the rubber when payloads are extremely heavy. Newly created, construction studs are being developed for road scarifiers, tunnel drillers, and tree stump removal equipment. They are rugged and adaptable to all tasks.

All studs include the drive tool which is specifically designed to allow for installation and removal of the studs if required.

IGRIP AND THE FORESTRY SECTOR

Contrary to chains which are bulky, costly, and at times, challenging to install, iGRiP studs have proven that "bulky" isn't always better. In the Forestry Sector, our studs provide greater stability, traction and breaking ability on both icy surfaces and rough terrain. They are versatile and installable on both tires and tracks.

IGRIP & BOOTS

iWhile studs are a must for machinery, they are also essential for work boots. iGRiP has developed boot studs to keep your work crew safe. These small screw-in studs are cost effective and provide necessary traction on icy surfaces.

INNOVATIONS FOR YOUR NEEDS

At iGRiP, innovation and development of new products is at the heart of our mission, and we work tirelessly at to improve and find solutions that the work. The entire iGRiP team is committed to listening to the customer's feedback and will stop at nothing to provide a product that will satisfy.
